We should sit down and figure out how much money we should set aside for S&E and deduct that from money going to USACE.

Hi Stan and Bill –

I will be able to spend all the money in the OU1 RA account by end of calendar year 2017. However, I would need to have all the money required on the USACE IA before they let a contract for OU1 RA construction in January 2016. I have \$20 Mill obligated already, we are aiming for the first phase to be under this amount, but depending on how the bids come back, we may need the additional Million that is in the OU1 RA account.

I will know the contractor bid costs and USACE oversight costs in late November. So why don't we just wait to ask for spending authority on this money until November when I know the contractor bids. At that time I will know for sure if I need any of the unobligated amount to be added to the IA.
Does that sound ok to you both?

Also, as an FYI – It sounds like some issues on the Nelson Tunnel side of the Hecla deal might delay the consent decree for both sites.

I think Andrea is trying to get a meeting together to go over issues in the next two weeks sometime. But my takeaway from Laurianne is that it might take a long time to resolve this issue (the new settlement money is not likely to come through in this calendar year was my impression)

Thanks – Joy

Hi Joy,

Bill and I talked about Spending Authority for Gilt Edge and Bill said that with all the Gold King issues, finance is behind in working with the program on setting up payroll billing to special accounts.

How much were you thinking of asking for this year, for OU1?
